

Forking va pull request

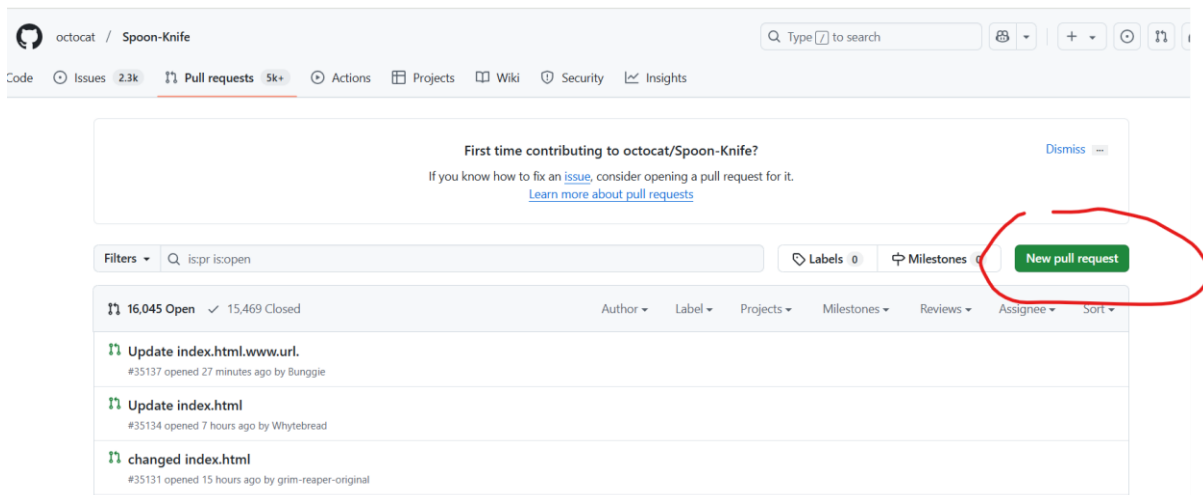

Forking bu githubdagi repositoryga access bulmaganda yoki original codeni buzmasdan unga uzgartirish kiritish maqsadida undan ko'chirib olish. Buning uchun repositoryning o'ng tomon tepa qismidagi fork tugmasi bosiladi

Shundan sung xuddi shu repositorydan uzimizning accountga copy qilib olamiz va uni urganib chiqib kerakli uzgarishlarni pull request qilamiz

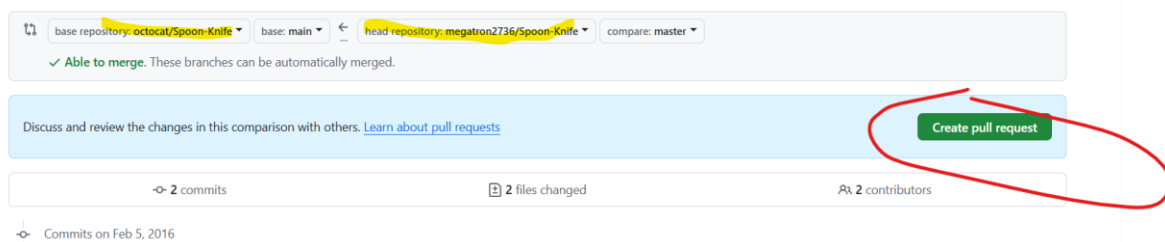

New pull requestni ustiga bosamiz

Create pull request

Comparing changes

Choose two branches to see what's changed or to start a new pull request. If you need to, you can also [compare across forks](#) or [learn more about diff comparisons](#).

Pull requestga title va description qushamiz

mening pull requesting #35138
